

## ISO14001

**ISO14001 - Environmental Management Systems - Specification with guidance for use** is an international standard that specifies the content of an EMS. An EMS which meets this specification may certify to the standard and avail of the benefits of same. Guidance on developing an EMS, but not necessarily for certification, is detailed in another international standard **ISO14004 EMS - General guidelines on principles, systems and supporting techniques** (ISO14004: 1996(E)).

ISO14000 is a suite of standards and guidance documents on a range of topics relevant to the environmental management of industrial processes and products. Further information of the ISO14000 suite and specifically ISO14001 is at <http://www.iso.ch/iso/en/iso9000-14000/iso14000/iso14000index.html>
